PROFESSIONAL PROFILE

I am a Systems Engineering, with 11 years of experience in the implementation of software engineering projects using the standard and agile methodologies. I have experience developing with Java, Spring, Spring Boot, Angular, Ionic, Oracle, SQL Server, PostgreSQL technologies, and integrating with other systems.

My working experience includes project management, software architecture, database management, and design, developing and deployment of web and desktop applications, on-premises as well as on the Cloud.

For the last four years, I have been the software development team leader on different projects at the company that I actually work for at the moment.

I have also been a teacher and lecturer on Java development software and related technologies.

I have excellent relationships at work; great leadership, and efficient communication skills; I am a team player, highly committed, and responsible.
